(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The structure is located in Huntington Park, adjacent to the City of Vernon, the first “exclusively industrial” city in America. The building is commercial in style and operates as the office/administration building for the Architectural Details company.

The integrity of this property appears to be moderate as recent construction has upgraded the setting in the vicinity to that of more modern industrial/commercial buildings. Additionally, it is not a particularly good example of the architectural style or of a method of construction. Research of available historical records has not uncovered any significant associations of the occupants.
